Instructors: Noam Cohen & Elad Kalif

Work Smarter, Not Harder

An AI training-readiness coach

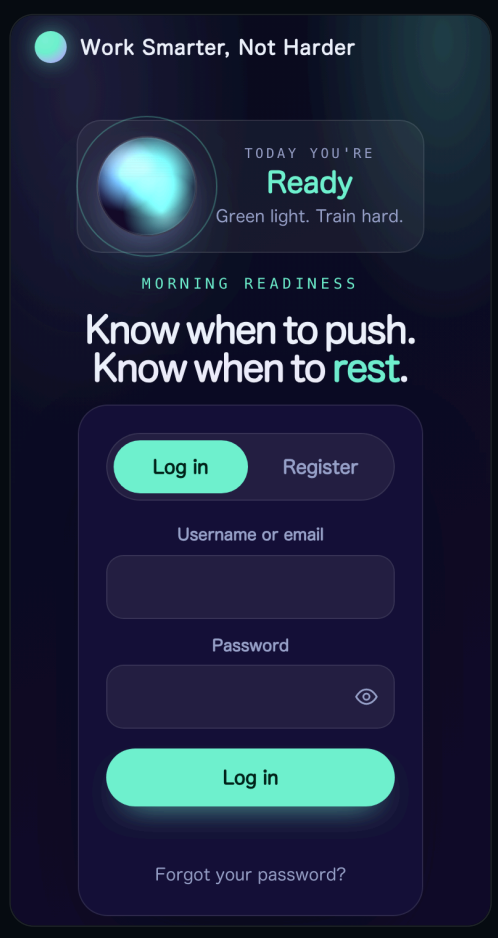

TEAM · Lior Ben Sidi · Shiri Haboob · Elad Nachalieli

WHAT IT DOES

- Log sleep, fatigue, soreness and load each morning.
- A **locally-trained Random Forest** calls your readiness.
- Ready, Moderate, or Rest — with a confidence score.
- It becomes an action plan: what to train, calories to eat.
- A community forum and real-time DMs keep you accountable.

UNDER THE HOOD

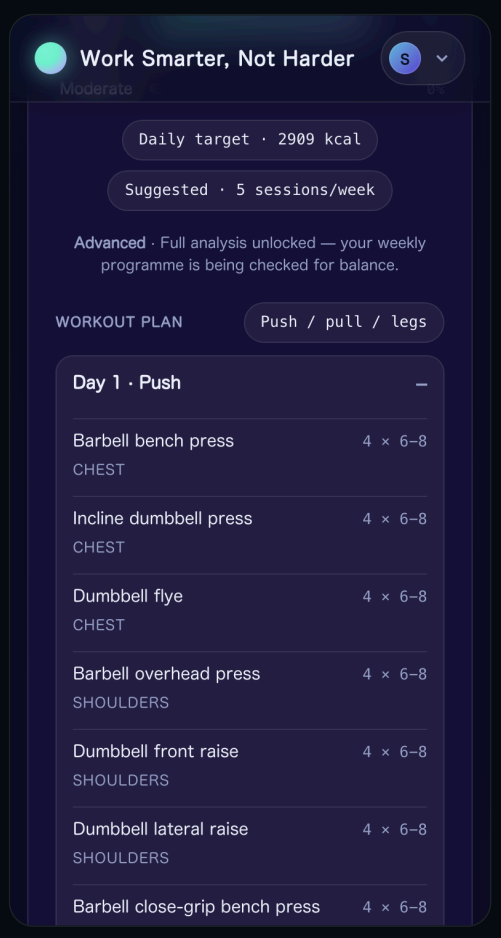

- Three Docker containers; only the web tier is exposed.
- Two-step email **OTP** login with signed **session IDs**.
- Email verification and 2-step login codes over **SMTP**.
- Custom domain on **Azure**; HTTPS certificates auto-renewed.
- CI/CD auto-deploys green commits; **all five test types**.
